R.E.LENDRUM & ASSOCIATES LTD

Walk past the new baby-corrugated zincalume clad entrance in the building on the corner of Main and King Streets and it gives no clue as to it's identity. Passers-by give it quizzical looks; others pause and try to peer in. The bolder walk in and ask what it is. Most are surprised to learn that the contemporary urban building is home to *R.E. LENDRUM & ASSOCIATES* LTD - a team of surveyors, architects, engineers, project managers and planners.

Step inside and you find yourself in an environment filled with texture, colour and light. To resolve your curiosity, walk into the reception and office areas and discover that even here, the image is not that of a traditional office. The reception area continues the themes of colour, shape and texture and evokes images of effervescent flavourings - a promise of good design and management.

Its creator, Bosnian born, *R.E. LENDRUM & ASSOCIATES* Architect, Davor Mikulcic has worked tirelessly on this project. The interior has been handled intelligently, giving the building a presence and strength. Colours are subdued with splashes of bright. Furniture is limited, but simple and practicable. Staff and clients, flow easily through the offices on a series of diagonals. The open-plan workspace is not thrown to the back of the building or screened off - on the contrary, each work space is exposed and people walking along the street can see through big glass screens, our everyday work, our projects, models, photos, etc. At the cutting edge of design, the building still fits effortlessly in to it's neighbouring surroundings. Our town deserves something like that, and it will be nice to see more interiors fitted out like this.

LENDRUMS have traditionally been surveyors and engineers but are now offering a complete range of architectural design, interior design, industrial design and project management.

With Davor Mikulcic our resident architect, Damien and Mark our designers and Jason and Kevin our Project Managers, *LENDRUMS* are adequately equipped to design your new home, or your additions and alterations and project manage the construction.

LENDRUMS at present and in the past have designed Rest Homes (Fergussons) church additions (St Joseph's - Upper Hutt, St Thomas More - Wilton Wellington), Liquor outlets (Smugglers) and motels (Wallaceville House), Commercial Interior Fitouts, Apartments, Industrial Buildings, Educational or either sport, religion and public buildings.

LENDRUMS have Paul Rohtmets, a registered civil engineer joining them on September 3rd, Paul will complete Lendrum's team.

Paul will be able to help you on matters concerning, drainage, roading, foundation design and any structural problems on proposed or existing buildings.

Paul has had 20 years experience in local body engineering.

LENDRUMS are grateful for the help they had in setting up their new office from: Builders & Joiners: Joe Henwood, Noel Bradley, Ron Playter and Chris; Electrician Mike Williams from CMC - Electrical; Rod Evans with his willingness to help build this interior from a model to real space; Ms Jane Evans, Professional Photographer who with nice photos is helping Davor create a new image of the company. Ms Bev Harris from New Image Interiors for supplying and installing new furniture on our offices, Ms Penny Wilson from ECC Lighting for supplying nice lighting for our new office, the team from Window Treatments for supplying and installing venetian blinds, the Blue Cat Graphics team for internal signage, Mr Hugh Coughlin from Beta Telecom Ltd for supplying and installing the sound system, Steve Hockly and his team from Twinlakes Sheetmetal Ltd., Nick Thomas and the team from Flair Flooring Ltd for supplying and installing carpet and vinyl for new offices, Paul Mussen and Barry Jones from Autes, Robert Kopua from Northern Ridge Security and the team from "Aden" Electrical Ltd for supplying and installing a security system for the office, Ms Denise Forrester from Initial Heatlthcare, Ms Nina Stephenson from Rentokil Tropical plants for supplying nice Yucca Plants for our office interior, Tony Taylor and team from Alstom for supplying and installing all data and Telecom installation, and Zane Hardcastle from "Hot Installation" for setting up the computer network in our new premises.

Without these people and many not included here, we would not have successfully finished our new office fitout.

Congratulations and once again a big THANK YOU from all the *LENDRUM'S* team.

AT LAST! - a breath of fresh air blows from the North End of our City! WELL DONE.
